The complex nature of scientific research can make experimentation complicated to plan and manage, and expectations to run a lab with the efficiency of a small business present additional challenges. During this interactive Lunch and Learn, we will explore the challenges associated with Laboratory Management and will learn about effective approaches to initiating, planning, and controlling project execution and to mitigating common errors and failures. The workshop has been specifically designed for faculty and will be directed by Tiffany Dahlberg, a Project Management expert.

A light lunch will be served. Please register at: https://gs.ucdenver.edu/limesurvey/index.php/431341

For special accommodations, please contact Patricia Goggans at: patricia.goggans@ucdenver.edu, 303 724 5878
