Biomedical research is in the center of digital revolution. In this “big data” era, every biomedical problem is a data problem. In this talk, we will briefly discuss the concepts of data science, analytical tools and research methods to translate biomedical big data to knowledge. We will review case studies and share some initiatives in the Anschutz Medical Campus that harness the power of big data in understanding disease mechanisms and enabling precision medicine.

A light lunch will be served. Please register at: https://gs.ucdenver.edu/limesurvey/index.php/815811

For special accommodations, please contact Patricia Goggans at: patricia.goggans@ucdenver.edu, 303-724-5878
