

THE GRADUATE SCHOOL PRESENTS:
**MASTER OF ARTS IN
 ANTHROPOLOGY**

LEARN WHAT'S KNOWN. DISCOVER WHAT'S NOT.

The graduate Anthropology program at the University of Colorado Denver offers courses ranging from medical anthropology, paleoanthropology and zooarchaeology to modern human variation. The well-established and dedicated faculty creates an environment that ensures holistic learning in every field of Anthropological study.

CAREER PATHS OF GRADUATES

Our research is uncovering answers to real-world problems and creating new innovations. Our highly engaged faculty provide mentoring, as well as research and leadership opportunities, so our graduates attract top employers and become intellectually-engaged global citizens who are ready to make a positive impact.

WHY CHOOSE CU DENVER?

We deliver a liberal arts and science education tailored to the demands of an ever-changing world. High-level critical thinking and comprehensive learning are infused with practical, career-focused skills throughout the curriculum. Our strong culture of scholar-teachers make us stand out from other top colleges.

Whether your interest lies in archaeology, medical anthropology or biological anthropology, CU Denver can provide the learning environment that will cater to your specific concentration.

CONCENTRATIONS

Medical Anthropology blends insights from medical anthropology and political ecology to offer students a holistic understanding of relationships among health, illness, poverty, development and the environment.

Biological Anthropology is concerned with modern human biological diversity and the evolutionary history that has led to that diversity.

Archaeological Anthropology concentrates on the study of past human societies using archaeological data collected in field and museum settings.
