PROFESSIONAL SCIENCE MASTER'S

GRADUATE SCHOOL

MS IN BIOMEDICAL SCIENCES & BIOTECHNOLOGY

LEARN. LEAD. SUCCEED.

ONE STEM DEGREE, MYRIAD CAREER OPPORTUNITIES

The Professional Science Master's Program in Biomedical Sciences and Biotechnology (BSBT) is an interdisciplinary, dual campus program that prepares students for careers in research, industry and business and can also serve as stepping-stone for further graduate or professional training. The Program provides broad training in the biomedical sciences as well as introductions to regulations, intellectual property, entrepreneurship, i.e. disciplines that add knowledge and competitiveness for entering the biotechnology workforce.

WHY CHOOSE BSBT?

Our students come from many different backgrounds with a variety of goals. Many students value the opportunity to join a program that allows them to deepen their knowledge in a specific area of interest or to aim for a broader education if they are still deciding on their future goals. The program leadership supports each cohort as a community of learners for mutual support and enrichment by meeting with students individually each semester to track their progress and to discuss their career goals.

EXPERIENTIAL LEARNING

Each BSBT student must complete an internship consisting of at least 10 onsite hours per week for one semester. Internships can be pursued in biotech companies, non-profit or government organizations, or in an academic laboratory. Substituting for a Master's thesis, interns write an extensive report and will discuss their projects and experiences with a faculty committee and fellow students.

PROGRAM HIGHLIGHTS

The flexible curriculum consists of 28 credits of core classes and 10 credits of electives. Students can work on the degree full- or part-time. The program culminates with an internship report and presentation rather than a Master's thesis.

We accept students for the fall and spring semester.

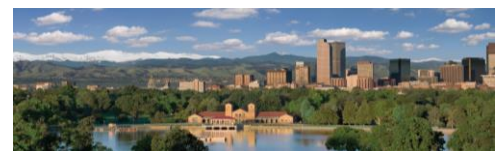

DOMESTIC STUDENT DEADLINES

Fall – May 1
Spring – Sept 1

INTERNATIONAL STUDENT DEADLINES

Fall – January 2
Spring – April 1
