

THE GRADUATE SCHOOL PRESENTS: MASTER OF ARTS IN ECONOMICS

WHY ECONOMICS IS RIGHT FOR YOU

The MA program in Economics trains students in quantitative and applied economic skills that will enhance their future employment opportunities in the private and public sectors, or their pursuit of PhD studies in economics or related fields.

CAREER PATHS OF GRADUATES

Many of our graduates use their MA degree in economics at CU Denver as a springboard towards pursuing a PhD degree in economics at highly ranked programs across the country. Our graduates are also employed by energy companies, defense contractors, health care agencies, banks and financial institutions, and other companies looking for employees who use real world data to answer research questions.

WHY CHOOSE CU DENVER?

Our MA program emphasizes extensive training in mathematical and quantitative analysis, including substantial exposure to applied econometrics, working with large and diverse data sets, and a wide range of statistical software. The program helps students develop the applied skills that employers demand, and provides those pursuing advanced degrees an edge in gaining admission to top-ranked PhD programs.

DUAL DEGREES OFFERED

Economics and Finance

Economics and Public Administration

Economics and Applied Mathematics

DEGREE DETAILS

The MA degree in economics can be completed in as few as three semesters by students who begin the program in the fall. Students working full time typically take four or five semesters to complete the program. All of our MA courses are offered at 5:00 p.m. or later.
