

THE GRADUATE SCHOOL PRESENTS:
INTERDISCIPLINARY
DOCTORATE IN HEALTH &
BEHAVIORAL SCIENCES

BE A PART OF INNOVATIVE RESEARCH IN HEALTH AND BEHAVIORAL SCIENCES

The PhD in Health & Behavioral Sciences prepares students to be leaders in the interdisciplinary field of population health. Our program draws on theories and methods from the social, behavioral, and health sciences, to understand health, health behaviors, and health care. A few recent research topics in our program include the AIDS epidemic, the social contexts of medical care, the diffusion of health behaviors through social networks, biases that shape decision making, the mechanisms that link social conditions to biological health, and the determinants of health disparities.

WHY CHOOSE CU DENVER?

HBS intersects social and behavioral sciences and public health. We prepare students for careers in academia, government, and other applied settings, such as researchers and teachers.

CAREER PATHS OF GRADUATES

Our recent alumni have taken postdoctoral fellowships at Yale, Columbia University, and the University of Texas at Austin; faculty positions at the University of Illinois at Chicago, School of Public Health, and Regis University; and research positions at Denver Health Medical Center, the Veteran's Administration, and Kaiser Permanente.

SPECIALIZED TRAINING IN

Social and Behavioral Health Theories

Human Ecology and Environmental Adaptation

Research Design

Social and Behavioral Determinants of Health

Quantitative and Qualitative Research Methods

Application and Financial Aid:

Students are eligible for scholarships, TA positions, and other funding opportunities.

Application deadline is January 1st.
