

**THE GRADUATE SCHOOL PRESENTS:
MASTER OF SCIENCE IN
HISTORIC PRESERVATION**

STUDY THE HISTORIC CULTURE OF DENVER, COLORADO

The College of Architecture and Planning’s Master of Science in Historic Preservation is a 45 credit hour program. The program is designed to accommodate the background and needs of students who have substantial experience and those new to the field. The course of study is designed for students seeking training in spatial, technical, and design aspects of the broader field. It encompasses architecture, cultural landscapes, preservation, planning, building technology, project management, documentation, interpretation, and representation.

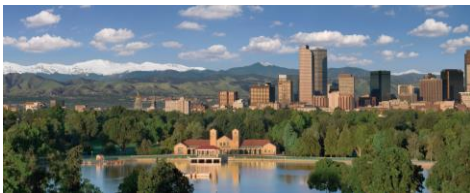

CAREER PATHS OF GRADUATES

Graduates are offered employment opportunities with state historical societies and preservation offices, historic sites and museums, conservation societies, city and state governments, heritage trust and nonprofit organizations, and environmental and design consulting firms.

WHY CHOOSE CU DENVER?

Located in historic Lower Downtown (LoDo), CU Denver is an exciting place to study historic preservation, as there is a strong preservation of culture here. Historic Denver, Inc., one of the nation’s premier historic preservation organizations, and the Old House Society are located in Denver.

Colorado Preservation Inc’s annual Saving Places Conference is the second largest preservation conference in the United States.

SPECIAL OPPORTUNITIES

Students in the MS Historic Preservation program have opportunities to engage in paid research assistantships with the college’s Center of Preservation Research, work on their NCARB Intern Development Program (IDP) internship hours, participate in field-based learning through Maymester and summer travel study, as well as propose and complete independent study projects together with a faculty mentor.
