

## THE GRADUATE SCHOOL PRESENTS: MASTER OF INTEGRATED SCIENCES

### A VARIETY OF DISCIPLINES AT YOUR FINGERTIPS

The Masters program in Integrated Sciences (MIS) provides students the opportunity to explore interrelationships between different fields of science. The MIS degree is designed for students who plan to pursue scientific knowledge in fields that do not fit traditional categories or those who desire competency in multiple scientific disciplines.

### CAREER PATHS OF GRADUATES

The MIS program allows students to tailor their educational experience to the challenges they will face in their careers, whether as entrepreneurs, highly skilled workers, or educators. Graduates of the MIS program gain entry into a variety of PhD programs in STEM and health sciences and MD programs. They also have enhanced proficiency across multiple disciplines and research methodologies.

### WHY CHOOSE CU DENVER?

Working closely with their faculty advisor and program director, MIS students tailor their program around their careers and interests. This rigorous curriculum is designed for professional growth in the student's area of interest, drawing on courses from a variety of areas.

The learning experience culminates in a required project or thesis that involves independent original interdisciplinary research. This research is conducted under the direction of leading faculty in STEM disciplines at both the Denver and Anschutz Medical Campuses.

### CHOOSE FROM A COMBINATION OF DISCIPLINES

Biology

Chemistry

Computer Science

Mathematics

Physical Geography

Physics

With approval, additional courses may be chosen from other areas of science and engineering, including popular topics such as GIS, Electrical Engineering, and Biostatistics.
