

THE GRADUATE SCHOOL PRESENTS: MEDICAL SCIENTIST TRAINING PROGRAM (MD/PHD)

TRAINING THE NEXT GENERATION OF PHYSICIAN SCIENTISTS

The Medical Scientist Training Program (MSTP) at the University of Colorado Anschutz Medical Campus is a multidisciplinary program educating students in clinical medicine and biomedical research. Our mission is to provide students with the breadth and depth of training necessary to excel as physician scientists. Trainees are recruited nationwide from post-baccalaureate students with proven exceptional talents in research science and a carefully considered motivation to pursue a career in medicine. The program receives enthusiastic support from the administration and the research and clinical faculty, providing a challenging and flexible environment for the training of physician scientists.

FINANCIAL ASSISTANCE

MSTP students receive full financial support for their entire period of training, including medical school. Student support includes all tuition and fees, including individual health and dental insurance, and provides an annual stipend of \$31,000.

APPLICATION PROCESS

The MSTP Admissions Committee is looking for individuals with a demonstrated commitment to medical research and service to community. They look at applicants as whole individuals, equally assessing academic achievement and past experience. Letters of recommendation, substantive bench research experience, test scores, and life experiences are all considered. All applicants must meet the academic prerequisites for the School of Medicine. Application deadline is October 15.

PROGRAM HIGHLIGHTS

STATISTICS

- 80 current students
- Average time to degrees: 8 years
- Average UG 3.74 GPA & 514 MCAT

KEYSTONE CONFERENCE

We host the National MD/PhD Student Conference which provides an opportunity for students from around the US and Canada to present their work and interact with prominent scientific investigators.

DIVERSITY AND INCLUSION

Our student body includes diverse ethnic, gender & socioeconomic backgrounds. Students from all backgrounds will find resources & support on campus.

MORE THAN A DOZEN PHD PROGRAMS

Bioengineering; Cancer Biology; Cell, Stem Cells, & Development; Chemical & Biological Engineering; Computational Biosciences; Human Medical Genetics & Genomics; Integrated Physiology; Immunology; Microbiology; Molecular Bio; Neuroscience; Pharmacology; Structural Biology & Biochemistry.
