

THE GRADUATE SCHOOL PRESENTS: MASTER OF SCIENCE IN RECORDING ARTS

BE A PART OF THE OLDEST AUDIO PROGRAM IN THE COUNTRY

The Master of Science (MS) in Recording Arts at CU Denver is the oldest audio program in the country. One of only a few such programs in the country, and the only one with a pedagogy track to prepare future educators. The degree offered by CU Denver is designed to prepare students for audio application careers in mass communications, education, arts and entertainment industries. Students will explore the latest analog and digital technologies used in studio recording sound reinforcement and electronic music, as well as the opportunity to master the artistic applications of those technologies to recording, composition, and performance.

CAREER PATHS OF GRADUATES

We have alumni in music studios all over the country involved with the film industry, gaming, live sound, and academia.

WHY CHOOSE CU DENVER?

- **Real-world Preparation:** We prepare students for careers in audio applications for the fields of mass communications, education, arts, and entertainment.
- **Quality:** We have some of the best faculty in the country in our program. Our faculty work professionally in audio and expect the highest standards from their students. They also have direct connections to people who work in the industry.
- **Studio Access:** As a small program, our studios are very easy to book.

PROGRAM HIGHLIGHTS

Students from allied disciplines (music, physics, engineering, etc) are encouraged to apply.

Graduate courses constituting the core of the MSRA advance the artistic, pedagogical, technical, and problem-solving abilities of students.

The curriculum offers an interdisciplinary approach including physics, acoustics, engineering, music, broadcast, medicine, psychology, multimedia, theatre, and film/video.
