Cyber Security and Information Assurance Certificate

Cyber Security and Information Assurance is a discipline that aims to combat computer, network and information crimes. This certificate program trains professionals in the field of information assurance, which supports and enhances the cyber security of enterprises such as banks, government, retail, health care institutions, law enforcement, construction, insurance agencies, transportation and the military.

COURSE INFORMATION

Cyber Security and Information Assurance certificate courses are scheduled for Oct. 17 - Dec. 17, Tuesdays and Thursdays from 6:30-9:15 p.m. All classes are held at the CU Denver Business School.

REQUIREMENTS

- ENTP 6850 Securing Enterprise
- ENTP 6855 Protecting Enterprise
- ENTP 6870 Securing Information Assets
- ENTP 6875 Protecting Information Assets

These are 8-week courses offered in a hybrid in-class and online format. Each course provides three credit hours at the CU Denver Business School.

The Cyber Security & Information Assurance certificate is also available as a specialization with a master's degree in information systems. For additional information about the certificate and the specialization, visit jakejobscenter.org or email sarah.engel@ucdenver.edu.
